

Progress takes you

Undergraduate Intern

The Software Engineering team delivers next-generation application enhancements and new products for a changing world. Working at the cutting edge, we design and develop software for platforms, peripherals, applications and diagnostics — all with the most advanced technologies, tools, software engineering methodologies and the collaboration of internal and external partners.

Join us as a **Undergraduate Intern** (Summer internship) on our **Engineering development team** in **Bangalore** to do the best work of your career and make a profound social impact.

What you'll achieve

As a Software Engineer, you will be responsible for developing sophisticated systems and software basis the customer's business goals, needs and a general business environment creating software solutions.

You will:

- Develop, test and integrate code for new or existing software while following source code revision control
- Troubleshoot software reliability and performance issues
- Review requirements, specifications and designs, developing and implementing tests for product quality and performance assurance
- Assist with the development and review of (technical) end user documentation
- Drive idea generation for new software products or for the next version of an existing product

Take the first step towards your dream career

Every Dell Technologies team member brings something unique to the table. Here's what we are looking for with this role:

Essential Requirements

- Strong foundation in computer science fundamentals: data structures, algorithms, operating systems, networking, and databases
- Proficiency in at least one programming language: Python, Rust, C, C++, Java, .NET or Golang
- Understanding of relational and/or NoSQL databases (e.g., MySQL, PostgreSQL, MongoDB)
- Knowledge of system design principles like SOLID and scalable architecture
- Familiarity with version control systems (e.g., Git) and collaborative development workflows
- Agile learning mindset with the ability to quickly pick up new technologies
- Strong problem-solving skills and a proactive attitude toward challenges
- Competitive programming experience with strong rankings or scores on platforms like **HackerRank**, **LeetCode**, **Codeforces**, **CodeChef**, **AtCoder**, or **TopCoder**

Desirable Requirements

- Exposure to cloud platforms (AWS, Azure, or GCP) and containerization tools (Docker, Kubernetes) is a plus
- Experience with CI/CD pipelines or DevOps practices
- Interest in AI/ML, data engineering, or cybersecurity

Who we are

We believe that each of us has the power to make an impact. That's why we put our team members at the center of everything we do. If you're looking for an opportunity to grow your career with some of the best minds and most advanced tech in the industry, we're looking for you.

Dell Technologies is a unique family of businesses that helps individuals and organizations transform how they work, live and play. Join us to build a future that works for everyone because Progress Takes All of Us.

Dell Technologies is committed to the principle of equal employment opportunity for all employees and to providing employees with a work environment free of discrimination and harassment. Read the full Equal Employment Opportunity Policy [here](#).
