
JOB DESCRIPTION: EMBEDDED HARDWARE ENGINEER (INTERN)

Location:EULER MOTORS

A-39, Block B, Mohan Cooperative Industrial Estate,
Badarpur, New Delhi, Delhi 110044

Duration:6 Months

Stipend: As per company policy

About the Role

We are looking for passionate engineering students to join our EV Hardware Development team. The intern will work on embedded electronics used in Battery Management Systems (BMS), Vehicle Control Units (VCU), Electronic Control Units (ECUs) chargers, DC-DC Converters and other automotive applications.

Responsibilities

- Assist in schematic design and PCB development.
- Benchmarking of the available products in the market.
- Perform hardware testing, debugging, and validation.
- Work with microcontrollers and communication protocols (CAN, UART, SPI, I²C).
- Support development of automotive and EV electronic systems.
- Preparing test code for the executing Test cases on Hardware.
- Prepare test reports and documentation.

Requirements

- Pursuing B.E./B. Tech in ECE (preferred), EE, E&I, Mechatronics, or related fields.
- Good understanding of Analog & Digital Electronics.
- Basic knowledge of Embedded Systems and Microcontrollers.
- Familiarity with CAN communication and PCB design tools is a plus.
- Strong problem-solving and debugging skills.

Preferred

- Hands-on experience with STM32, Arduino, ESP32, or similar platforms.
- Participation in EV, Formula Students, Robotics, or embedded projects.
