

BlackRock

BlackRock – Aladdin Data Internship

Locations: Gurgaon, Mumbai, and Bangalore, India

Position: Intern – Aladdin Data Engineering Track

About BlackRock

At BlackRock, our purpose is to help more and more people experience financial well-being. Our clients invest in achieving meaningful goals—preparing for retirement, funding education, purchasing homes, and building businesses. These investments also support the global economy by financing infrastructure and driving innovation. Our people are our greatest investment. We are committed to creating an inclusive, collaborative, and forward-thinking workplace where individuals are empowered to grow, contribute, and thrive. To learn more, visit www.blackrock.com.

About the Aladdin Data Internship

The Aladdin Data Internship is designed for students who are passionate about data, technology, and innovation. As an intern, you will contribute to meaningful, real-world projects that support BlackRock's

Aladdin platform—a leading investment management and operations system used by financial institutions around the world.

Based on your interests and experience, you may be aligned with one of the following engineering tracks:

- **Data Engineer:** Build scalable data pipelines while supporting data quality, governance, and reliability.
- **Private Markets Engineer:** Develop data and analytics solutions tailored to the unique requirements of private markets.
- **Product Engineer:** Help shape product capabilities and user experiences through data-driven insights and engineering solutions.

What You'll Do

During the internship, you will have the opportunity to:

- Understand business and engineering requirements and translate them into focused, testable AI or data solutions.
- Work with structured and unstructured data from databases, APIs, files, documents, and enterprise systems.
- Develop prototypes for use cases such as document extraction, information classification, semantic search, retrieval, summarization, and workflow automation.
- Prepare data for machine-learning and generative-AI applications through ingestion, transformation, validation, metadata management, and quality checks.
- Build and test solutions using technologies such as Python, Java, Spark, data stores, APIs, and relevant AI or natural-language-processing frameworks.
- Create evaluation datasets and assess AI outputs for accuracy, relevance, consistency, reliability, and common failure patterns.
- Add appropriate logging, monitoring, validation, and human-review steps to improve the operational reliability of AI-enabled workflows.
- Collaborate with engineers, data specialists, product teams, and other technology partners to refine solutions through feedback and testing.
- Document technical decisions, experimental results, limitations, and recommended next steps.

- Present your work through demonstrations, design discussions, team forums, hackathons, and innovation challenges.
- Take ownership of a defined project from initial exploration through implementation, testing, documentation, and handover.

What We're Looking For

We welcome applications from students who demonstrate:

- Strong analytical thinking and problem-solving abilities.
- Intellectual curiosity and a genuine passion for technology and continuous learning.
- An understanding of object-oriented design and software development principles.
- Familiarity with artificial intelligence, machine learning, data engineering frameworks, or related tools—considered an advantage.
- Excellent communication, teamwork, and collaboration skills.
- A strong commitment to product quality, reliability, and user experience.

Learning and Development

As an Aladdin Data Intern, you will benefit from a supportive and engaging learning environment that includes:

- Experience within a specialized technology stream, complemented by broader exposure through networking and cross-functional project work.
- Access to BlackRock Academies, mentorship programs, career coaching, and professional-development resources.
- Opportunities to engage with senior leaders and participate in internal forums, events, and knowledge-sharing sessions.

Equal Opportunity Employer

BlackRock is proud to be an Equal Opportunity Employer. We evaluate qualified applicants without regard to age, disability, family status, gender identity, race, religion, sex, sexual orientation, or any other characteristic protected by applicable law.
