

Job Description Electrical Engineer

Location–DelhiNCR

Euler Motors, founded in 2018, is an OEM (Original Equipment Manufacturer) specializing in electric vehicles for commercial applications. The company is committed to delivering high-quality products that integrate the latest advancements in engineering and technology.

With a focus on innovation, Euler Motors aims to develop advanced electric vehicles that offer exceptional performance and reliability. Described as “**intelligent computers running on wheels,**” these vehicles go beyond transportation — they are smart systems capable of collecting, processing, and analyzing data to provide real-time insights into vehicle performance and operations.

About the Role:

Euler Motors is at the forefront of revolutionizing Electric Vehicle (EV) technology, and we are seeking a skilled **Electrical Engineer** to join our dynamic team.

As an Electrical Engineer, you will play a crucial role in shaping the **electrical architecture** of our cutting-edge electric vehicles.

JOB DESCRIPTION

Wire Harness Design and Development

- Design and develop **2D schematics** and perform **3D routing** for LV and HV wire harness systems.
- Select appropriate **electrical components** including fuses, relays, connectors, wires, and contactors as per schematic and safety standards.
- Collaborate on **vehicle electrical architecture** to support advanced EV system integration.
- Ensure all designs meet **automotive wiring standards (ISO-6722)** and are compliant with regulatory requirements.
- Perform **simulation and analysis** of electrical and electronic circuits for validation and testing.

DVP – Electrical Systems

- Develop and manage **DVP&R (Design Validation Plan and Report)** for electrical components and harnesses.
- Coordinate and execute **bench, lab, and vehicle-level tests**.
- Work with cross-functional teams to analyze test data and resolve issues.
- Ensure validation is aligned with **automotive standards** (AIS, ISO, etc.).
- Prepare and maintain **test reports and documentation**.

EV Electrical Component Selection, Evaluation, and Validation

- Identify and select appropriate **electrical components** such as:
 - Fuses, relays, contactors, connectors, wiring, and terminals
 - Sensors (temperature, current, voltage), DC-DC converters, and HV components
 - Switches, insulation materials, and sealing components
- Analyze component specifications to ensure compatibility with **vehicle electrical architecture** and **system requirements**.
- Collaborate with design and simulation teams to assess **thermal, current, and voltage ratings**.
- Ensure selected components comply with **automotive and EV standards** (AIS, ISO, IEC, etc.).

BMS Application Engineering

- Conduct **State of Charge (SoC) vs Open Circuit Voltage (OCV)** testing and analysis.
- Perform **Internal Resistance (IR)** testing and **Hybrid Pulse Power Characterization (HPPC)** testing.
- Apply knowledge of **Q-Count methods** for accurate SoC estimation.
- Design and simulate **Pre-Charge Circuits** for battery management systems.

Skills:

Electrical requirements:

- Proficient in **AutoCAD, Creo, and Siemens Capital** Or any other Electrical simulation software for both 2D and 3D electrical design tasks.
- Use these tools to create **precise, manufacture wire harness designs** while balancing functional requirements and aesthetic constraints.

Qualifications:

- Bachelor's degree in Electrical/Electronics/Mechatronics/Automotive Engineering or related field.
- Experience in **Electrical Architecture** in the automotive or EV domain.
- Strong understanding of **electrical testing standards**, equipment, and methods.
- Hands-on experience with **measurement tools, environmental test chambers, and diagnostic tools**.

Euler Motors has a very collaborative work atmosphere. When you join Euler Motors, you do more than simply join a company to advance your career — **you become part of our family**, a group of talented individuals who drive innovation, embrace change, and strive to become industry leaders.

Euler Motors is an **Equal Opportunity Employer**. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, or disability.
