

## Job Summary:

We are seeking a skilled and motivated **Software Developer** with strong programming expertise in **Python** and/or **C# .NET**. The ideal candidate will be responsible for designing, developing, and maintaining scalable applications, while collaborating with cross-functional teams to deliver high-quality software solutions.

## Key Responsibilities:

- Develop and maintain applications using **Python** and/or **C# .NET**.
- Participate in the full software development lifecycle including design, development, testing, and deployment.
- Write clean, efficient, and well-documented code.
- Collaborate with product managers, designers, and other developers to understand requirements and deliver solutions.
- Troubleshoot, debug, and optimize existing codebases.
- Stay updated with the latest development trends and best practices.

## Required Skills:

- Strong coding skills in **Python** and/or **C# .NET**.
- Experience with frameworks such as **Django/Flask** (Python) or **ASP.NET/.NET Core** (C#).
- Familiarity with RESTful APIs, microservices architecture, and database integration.
- Good understanding of object-oriented programming and design patterns.
- Experience with version control systems like **Git**.

## Preferred Qualifications:

- Exposure to cloud platforms (AWS, Azure, GCP).
- Experience with CI/CD pipelines and DevOps practices.
- Knowledge of front-end technologies (e.g., HTML, CSS, JavaScript) is a plus.

- Strong problem-solving and analytical skills.

## **Education:**

- Bachelor's or Master's degree in **Computer Science, Software Engineering**, or a related field.
