

Key Responsibilities:

- Assist in the development and maintenance of software applications using Java, Python, or JavaScript.
- Collaborate with senior developers to design, implement, and test features and functionalities.
- Participate in code reviews and contribute to the improvement of coding standards.
- Support the software testing process by writing and executing test cases.
- Identify, report, and help troubleshoot software defects.
- Learn and apply best practices in software development and testing methodologies.
- Participate in team meetings and contribute to project planning and status updates.
- Continuously enhance your skills and knowledge in programming and software testing.

Qualifications:

- Basic understanding of programming concepts and foundational skills in one or more of the following languages: Java, Python, or JavaScript.
- Familiarity with basic software testing principles and practices.
- Strong problem-solving skills and attention to detail.
- Ability to work collaboratively in a team environment.
- Eagerness to learn and adapt to new technologies and tools.
- Excellent verbal and written communication skills.

Preferred Qualifications:

- Some exposure to software development environments, version control systems (e.g., Git), and Agile methodologies is a plus.
- Academic background in Computer Science, Information Technology, or a related field is preferred, but not mandatory.
